

## **BC Java Developer for Fixed Income Trading Desk**

We are a specialized financial services company providing customized portfolio and risk management solutions to investment management firms, hedge funds, investment banks, and broker-dealers. We are highly regarded as best in class in the segments covered by us.

We have two year project to develop front office trading screens in rich dynamic web pages. To build rich dynamic web pages , in addition to basic HTML, Javascript one would need JQuery/ExtJS/Angular JS skills in addition to some backend using Spring/Hibernate etc. ( Angular, Ext JS, JQuery etc in addition to HTML/HTML5/Javascript ). Further working in Spring 3.0 etc.

This is a tremendous opportunity to work directly with some of the top MBS traders and quants in the world.
