

pc Senior Developer

We have a 4 year project in Orange County California involving Portfolio Management applications.

We are building a real-time risk management system that will automatically red flag any high risk trades or portfolio imbalances.

We require:

Strong UNIX C++, OOP, multi-threading, design patterns, database skills (Oracle preferred)

Excellent problem solver

Can work autonomously and collaboratively and follows SDLC

Finance knowledge is a plus

Java experience preferred, but not required (the job will mostly entail C++ for the next 6 months)

Focus Capital Markets is 38 years young and is the place "Where Wall St. and Technology Meet"
